

Greetings!

Just a quick reminder about Alumni Weekend. This year the Chemistry Department is having a special reception and social time, something we've only done twice before in recent years. We are excited to host this event this year, since it is our 100th birthday as a department! That's right - the Chemistry Department was established in 1904-05! We sincerely hope you can join us, because we really like talking with our alumni. We don't get a chance to do that often enough. We'll be celebrating the renovation of two more of our teaching laboratories in the last several years (a total of four have now been renovated), current research projects, etc.

- The Chemistry reception is Saturday, April 23rd, 3:30 - 5:30 PM
- We will meet in the Trexler Hall Lobby, and in room 362. Tours of remodeled labs will be available. Dr. Ron Oetgen is also planning a presentation on the 100 years of our history.
- Wine and cheese refreshments will be available, as well as a birthday cake!
- A special commemorative mug will be provided for all attendees. A one of a kind design!
- Lots of socializing with other alumni, our current faculty, and our current students!

It won't be a party without you. We hope you can join us!

Sincerely,

Gail Steehler
Chair, Department of Chemistry
