

Physics 102/103 Laboratory Fall 2022

Meeting: Trexler 274
Instructor: Bonnie W. Price
Email: price@roanoke.edu

Office: Trexler 161B Office Phone: 540-375-2408
Office Hours: MW: 12:00 pm – 3:00 pm
Other times by appointment

Required Materials:

Pre-lab assignments are available online through Inquire. Lab instructions will be posted on Inquire and you may either print and bring a copy, or bring a laptop with a digital version of the file. You may not access the lab on your phone. A bound lab notebook (sewn pages, not spiral bound) with graph paper pages is needed, as well as a scientific calculator that is not a cellphone, and a pencil or pen.

Goals:

The following five goals will serve as the framework for the activities within the Lab: *the Art of Experimentation, Experimental & Analytical Skills, Conceptual Learning, Communication, and Collaborative Learning Skills*. New experimental techniques will be introduced, as well as analytical tools in dealing with errors. Hopefully the laboratory experiments will clarify and expand concepts introduced in lecture, while practicing report writing and your ability to clearly communicate accurate results to your colleagues and instructor.

Intended Learning Outcomes:

Upon completing this course, students will be able to

- conduct scientific experiments and obtain accurate data
- discuss the results of an experiment quantitatively and qualitatively
- identify sources of error that appear in experimental methods and
- communicate experimental results in a coherent, well-organized, written manner.

Attendance Policy/Make-up Labs:

Since 25% of your 102/103 grade depends on the laboratory, *you must enroll in both the lecture and laboratory sections of 102/103, and **all experiments must be completed***, or your lecture final grade will be reduced a letter grade.

You may *only* attend the lab section for which you are registered, unless you have permission from the instructor prior to your regularly scheduled lab section. Special considerations for missing a lab session will be given on a case-by-case basis, due to extenuating circumstances, which could include coronavirus symptoms. In order to make up a lab missed because of a visit /consultation with Health Services, you must give Health Services permission to notify me. One missed lab may be completed during the make-up week at the end of the semester, and the report from that make-up lab is due within four days of the completed experiment.

Students will work in groups, the exact number in the group depending upon the class enrollment. This pairing is student choice initially, but the instructor reserves the right to rearrange groups as the semester progresses.

You are not required to wear a face covering/mask over the mouth and nose while in academic buildings at this time, but you may for personal reasons. **Do NOT come to lab if you have a temperature of 100.4°F or higher, or other coronavirus**

symptoms, and call Health Services IMMEDIATELY. If you test positive for COVID, you must be in isolation for 5 days, and must wear a mask for the next 5 days. If you have come in contact with a person who has COVID, you must wear a mask for 10 days.

Pre-lab Assignments:

Prelab assignments are posted on Inquire several days in advance of each experiment. The purpose of the pre-lab assignment is to familiarize the student with the upcoming experiment and to begin getting the lab notebook ready for lab. The prelab assignment is completed in the lab notebook, and the notebook will be checked and initialed by the instructor at the beginning of lab.

No prelab assignments will be accepted after the beginning of lab.

Lab Notebooks:

Each student is to purchase and bring a bound notebook with sewn graph paper pages to lab each week. The goal of the lab notebook is to practice recording data and results in a well-organized and legible format.

Each student will submit photos of their lab notebook through an Inquire link within one hour of the posted ending time for the experiment. The only way that a student will be able to complete data collection and analysis in the allotted time is to be prepared with data tables in their notebook and familiarity with the experimental procedure before coming to class. **If a student does not bring their lab notebook, the lab may still be completed on loose-leaf paper and the report submitted, but a grade of zero will be recorded for the lab notebook grade.**

Lab Reports:

Since one of the course objectives is to communicate experimental results in a coherent, well organized, written manner, it is important to practice writing lab reports. Most physics lab reports consist of four sections: *Abstract, Introduction, Data and Results,* and *Discussion.* This course will emphasize the *Abstract* and *Data and Results* sections.

All reports will be individually submitted, and a separate document will describe the format and content of the abstract and data and results sections. **Reports will be submitted through Turnitin on Inquire and will be due at 11:59 pm four days from the completion of the experiment. This means that the Thursday section will have their report due on Monday of the following week.**

All individually submitted reports must be your own work. If the submission is a graph that was originally created during lab, it still must be recreated by you for the report, and not simply copied and pasted from the original person who graphed the results. The time stamp placed on the upload by the server will determine when the work was submitted. ***Unless an extension is granted beforehand,*** all late items will be reduced by 10% for each 24-hour period beyond the due date/time, for school days (Monday through Friday). As a result, after one week, assignments receive a 50% reduction and after two weeks, assignments receive a 100% reduction; that is, no assignment will be accepted if more than two weeks late. **The two lowest report grades will be dropped at the end of the semester.**

Academic Integrity:

Although students working within the same group will have the same data, recording of the data into the lab notebook is to be completed individually, written in table format. Group members may share Excel graphs created during lab time in order to be secured in each student's lab notebook. Error values are to be calculated individually in lab notebooks, as well as sample calculations using the data. Results should be organized and recorded in each student's notebook.

Submitted lab reports will be written individually, and must be each student's original work, except for shared data. The student submitting the report must recreate all graphs and tables submitted. All reports electronically submitted will come through Turnitin and not through email. The college's academic integrity policies will be enforced.

Grading:

All grades will be recorded on Inquire. Do not discard any graded work until the end of the semester. If there is a discrepancy between the grade recorded on Inquire and on the report, proof of the grade must be produced in order for the grade on Inquire to be changed. All lab grades will be determined using a grading rubric, which includes lab work, lab notebook, and report writing.

At the end of the semester, your overall lab average will be sent to your lecture instructor. No curves will be applied to your lab grade. The final lab average will be determined as the average of the nine highest experiment grades.

Electronic Devices Usage Policy:

Computers in the lab are networked and you are required to log into them with your username and password. **Do not save any work to the lab computers** unless you save it to your Z: drive or onto a personal USB device; all other drives are purged when you log out. During the class, the computers in this room are to be used only for the completion of assignments directly associated with this course. **Computers, including laptops, are not to be used to check email or access the Internet for personal reasons during class.**

Out of courtesy to others, **all cell phones should be silenced** upon arrival to class and **should be out of sight.** If you are engaged with your cell phone, then you are not engaged with your lab partner and the experiment. You have been warned, so no additional warning is needed. Also, MP3 players, cameras and other personal devices are not to be used during class. Personal laptops may be used to view the lab instructions and create graphs in MS Excel, but the graphs must be printed for the lab notebook before the notebook photos are submitted.

Additional Policies:

No food is allowed in lab, but drinks may be brought into the lab if in a screw top or enclosed container. Also, no tobacco products are allowed in lab. **Each member of this class is expected to treat everyone with respect, contribute to a welcoming and inclusive environment, and equally contribute to the work during lab sessions. I will gladly honor your request to address you by an alternate name or gender pronoun, if you advise me of this preference early in the semester so that I may make the change to my records.**

Course Outline:

Date	Lab Topic	Report
September 8	Course Policies Experiment 1: Data Analysis	MS Excel Graph
September 16	Experiment 2: Kinematics in One Dimension	Data and Results
September 22	Experiment 3: Projectile Motion	Abstract
September 29	Experiment 4: Force and Equilibrium	Abstract
October 6	Experiment 5: Conservation of Energy	Abstract
October 13	Experiment 6: Linear Momentum and Collisions	Abstract
October 20	<i>Fall Break</i>	
October 27	Experiment 7: Rotational Kinematics	Data and Results
November 3	Experiment 8: Torque	Data and Results
November 10	Experiment 9: Standing Waves in Strings	Data and Results
November 17	Experiment 10: Buoyant Force and Archimedes' Principle	Data and Results
November 24	<i>Thanksgiving Break</i>	
December 1	Experiment 11: Calorimetry	Abstract
December 8	<i>Make-up Week</i>	Assigned Report due within 4 days of completed lab
